Occupational Employment and Wages for Selected Construction Trades Occupations in Selected Georgia Metropolitan Areas – May 2016

Each of the selected 12 metropolitan areas located partially or entirely in Georgia had annual wages that were significantly below the national average for carpenters, the U.S. Bureau of Labor Statistics reported today. Eleven areas had below-average wages for electricians, and 11 had below-average wages for plumbers, pipefitters, and steamfitters. Regional Commissioner Janet S. Rankin noted that among the 12 selected metropolitan areas, none had annual wages significantly above the U.S. average for the three selected construction trades occupations. Nationwide, the average (mean) wage for carpenters was \$48,340; for electricians, \$56,650; and for plumbers, pipefitters, and steamfitters, \$56,030. (See [table A](#). For comprehensive definitions of metropolitan areas in Georgia, please see [Technical Note](#).)

Wages for carpenters in selected metropolitan areas in Georgia

Each of the 12 selected metropolitan areas in Georgia had wages significantly below the U.S. average of \$48,340 for carpenters. The lower paying areas included Albany (\$30,650), Macon (\$32,490), and Warner Robins (\$34,130). Among the remaining areas, average wages for carpenters ranged from \$43,440 in Savannah to \$37,240 in Brunswick.

Wages for electricians in selected metropolitan areas in Georgia

Electricians in 11 of the 12 selected metropolitan areas had wages measurably below the national average of \$56,650, including Brunswick (\$40,890), Columbus (\$42,310), and Athens-Clarke County (\$43,710). Electricians in the Warner Robins area earned wages that were not measurably different from the U.S. average.

Wages for plumbers, pipefitters, and steamfitters in selected metropolitan areas in Georgia

Plumbers, pipefitters, and steamfitters, earned below the U.S. average of \$56,030 in 11 of the 12 selected metropolitan areas in Georgia. Macon (\$33,940), Albany (\$37,110), and Augusta-Richmond County (\$39,360) were among the lower-paying areas. Wages for plumbers, pipefitters, and steamfitters in Brunswick were not measurably different from the national average.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the Georgia State Department of Labor.

Note on Occupational Employment Statistics data

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels, and national estimates by ownership across all industries and for schools and hospitals. OES data are available at www.bls.gov/oes/tables.htm.

OES estimates are constructed from a sample of about 1.2 million establishments. Each year, two semiannual panels of approximately 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2016 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2016, November 2015, May 2015, November 2014, May 2014, and November 2013. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 73 percent based on establishments and 69 percent based on weighted sampled employment. The unweighted employment of sampled establishments across all six semiannual panels represents approximately 58 percent of total national employment. For more information about OES concepts and methodology, go to www.bls.gov/oes/current/oes_tec.htm.

The May 2016 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at www.bls.gov/soc and information about the 2012 NAICS is available at www.bls.gov/bls/naics.htm.
